LITE ON COST • LITE ON WEIGHT • LITE ON VIBRATION • **BIG ON POWER**

# DOES MORE, FOR LONGER, WITH BETTER PERFORMANCE

## LITE HANDPIECE

- We are pleased to introduce our elegant straight case modular handpiece with its unique dual position trigger function, allowing complete grip flexibility.
- Lightest large bone system on the market delivering unmatched power to weight performance.
- Continuous development in handpiece ergonomics ensures class leading surgeon comfort.
- Effortless attachment assembly. Simply 'push and click' and you are ready to go.

## INNOVATIVE SAW HEAD DESIGN

- Innovative '**Zero Play**' blade mounting mechanism eliminates unwanted vibration and noise.
- Superior saw head reliability is achieved through the reduction of mechanical play within the saw mechanism.
- Simple blade loading is achieved with a totally unique '**push and click**' action.

## TOTAL SYSTEM FLEXIBILITY

- Complete compatibility with existing De Soutter Medical systems already on site, ensuring cost containment.
- The orthodrive® Lite system provides greater flexibility than ever before allowing it to be used for both large bone and trauma procedures, without compromising performance.

## BATTERY CHARGERS

### BC-700 BATTERY CHARGER

shown with aseptic batteries.

The BC-700 Battery Charger requires minimal user input, simply insert battery and the BC-700 will charge, recover and recondition it to its optimum state. **The large touch-screen display** with intuitive menu navigation, displays instant battery charge status and condition. Includes a multi-lingual display and other user settings.

The BC-700 also offers a **unique healthcheck facility**, profiling the condition of an individual battery, automatically reconditioning it, to provide optimal capacity. Alternatively, a manual healthcheck can be easily selected. The BC-700 Battery Charger accepts all De Soutter Medical batteries, ensuring total backwards compatibility.

# LITHIUM ION STERILE BATTERIES

## Why choose Lithium Ion battery technology

De Soutter Medical Lithium Ion batteries offer the surgical team and sterile services a number of tangible benefits over conventional battery technology.

Key advantages are:

- Li-Ion technology improves battery 'capacity to weight' ratio when compared to NiMH or NiCad chemistries.
- Significantly extends the useable run time of the power tool.
- Eliminates 'memory effect' normally associated with other battery types.
- De Soutter Medical sterile Li-Ion technology readily withstands repeated machine washing and autoclaving.
- Unique fuel gauge incorporated within De Soutter Medical Li-Ion batteries allows the surgical team to instantly assess the battery capacity - both before and during use.

LOADING AN ASEPTIC BATTERY PACK

1

Press both catches to open housing.

2

With the aseptically sealed housing open, the sterile operator fits the aseptically sealed shield over the opening.

3

The non-sterile operator inserts the fully charged aseptically sealed battery into the housing.

4

The non-sterile operator removes the aseptically sealed shield.

5

The sterile operator closes the aseptically sealed housing until the lid clicks shut, ensuring the housing is fully closed.
